

SAFEQUIP

SITE SAFETY COORDINATION

SITE SAFETY CATALOGUE

EDITION#2

CORPORATE PROFILE

ABOUT US

SafeQuip focuses on delivering high quality site safety solutions to Australian organisations.

With almost 30 years experience in the industry, SafeQuip are dedicated to providing the best service at competitive rates.

Our specialists are skilled in developing innovative signage and our in-depth knowledge of site safety means you are always in safe hands.

CONSULTATION

Our in-house consultants are dedicated to providing our customers with cost effective and detailed site safety audits.

This service also includes risk assessments, site surveys and specialist consultations.

PROJECT MANAGEMENT

The SafeQuip team will manage your entire project from conception to completion. Allowing us to manage multiple projects ensures that different facets of the project will be completed in a timely manner.

Taking advantage of our project management capabilities means that multiple projects will be combined into one easy to handle package. Depending on your needs, packages can include signage, line-marking, concrete sealing, wheel-stops, bollards and barriers.

INSTALLATION

As part of the project management system at SafeQuip, we offer an installation service where members of our team will install your purchase safely and efficiently. For best results, we strongly recommend that our professionals install certain products. Delivery or installation will be organised at a time that is the least disruptive to your organisation.

Our install team are continually trained to be compliant to the latest legislation. This includes WH&S legislation, height safety regulations and Current Codes of Practice. We also maintain relevant insurances, compensation and code compliance.

CONTRACT CONSOLIDATION

SafeQuip's ability to organise and manage vastly different aspects of a project allows you to consolidate contracts – combining what would usually be two or three contracts into one.

Contract consolidation will save you time as there are fewer contracts to manage. It is also cost effective since you can take full advantage of project pricing.

From start to finish - there's only one contract, one team and one goal.

SITE SAFETY AUDIT

COMPLYING TO SITE SAFETY STANDARDS

Using our specialist site safety engineers we inspect the site, review the people and vehicle movements speak with key management and operational staff and take a number of onsite photos and images to assess the potential safety risks.

Based on the inspection and their experience Safequip's site safety engineer, we then prepare detailed:

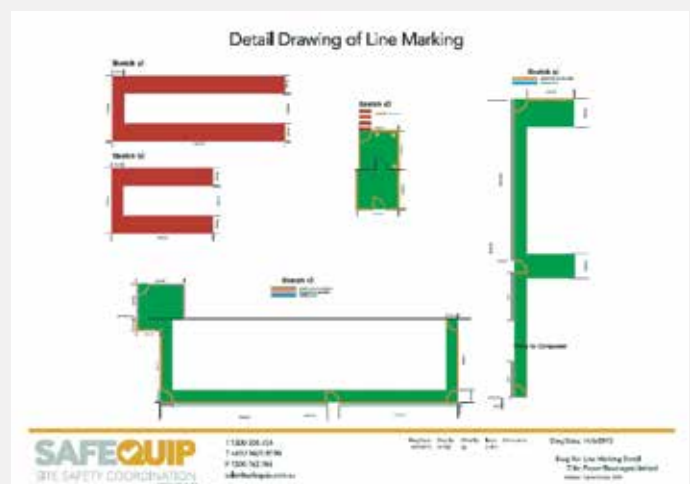

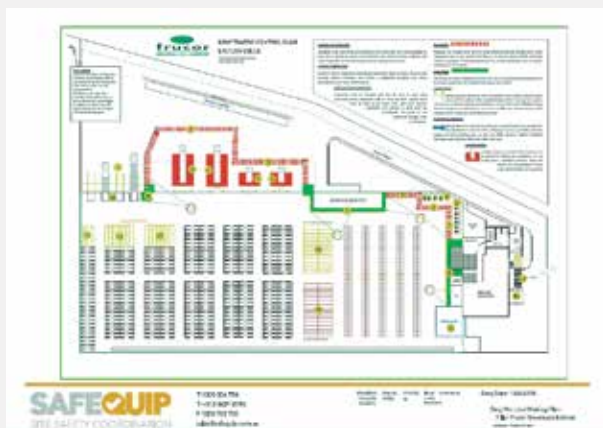

- Site safety plans listing all the line markings, signs and safety barriers needed to minimise the risk to gear, people, stock and vehicles
- Traffic control plans that set out all the key markings, signs and bollards that should be prepared and installed in the facility

SITE SAFETY AUDIT

COMPLYING TO SITE SAFETY STANDARDS

A comprehensive document that will protect your staff and contractor's safety, ensure the efficient movement of vehicles and products and assist in compliance with the government safety standards and expectations.

LOAD RESTRAINT & SAFETY

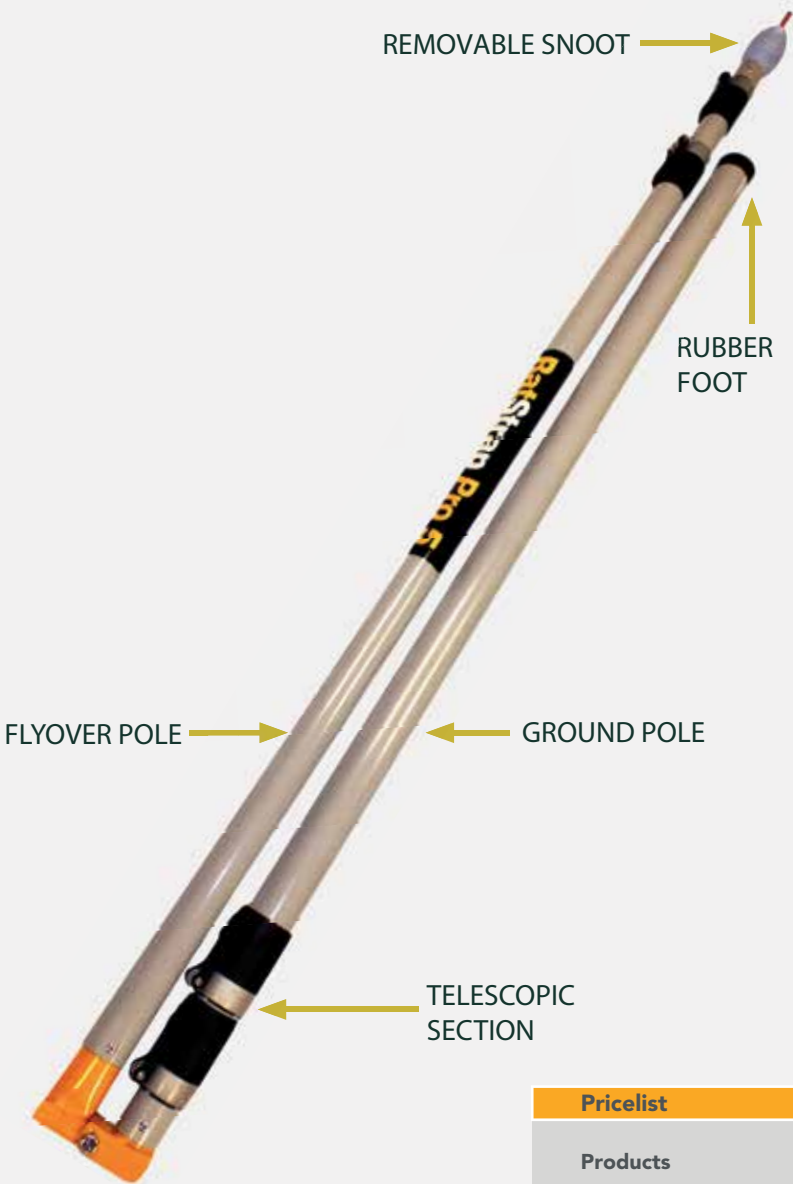

Part of our new Boots on the Ground Range

Boots ON THE **Ground**®
Helping you Safely Comply with
"Working At Height" Regulations

RAT STRAP PRO

SQ-H-056-3

RatStrap Pro® Every truck must have one!

FEATURES & BENEFITS

- The new method for getting a CargoStrap safely over a load, while the operator stays safely on the ground!
- It even has the ability to operate where there is only a 80mm gap between the top of a pallet and the ceiling.
- Tough and lightweight, the RatStrap can be reduced in length to 1.4m sections making it possible to carry in the truck.

DID YOU KNOW?

Workcover recommends the use a system to apply and remove lashing and corner protectors while standing on the ground, such as a purpose-built lightweight extension pole, especially one that grips the lashing or corner protector

ProPole Short 2'-4'
(H-055-4-5)

FEATURES & BENEFITS

- Work: Quickly, Easily and Safely With the **ProPole®** from **SafeQuip**
- 'Its fantastic! I've never seen anything like it!'
- It gets the job done quickly and easily, cuts the fines of getting on the back of trucks and my drivers love using it!'

The ProPole® Solution

Climbing up on the back of a truck is both difficult and dangerous. In commercial haulage applications, it is also completely illegal without the correct safety measures in place.

These are often cumbersome and very expensive. When it's simply a case of adjusting straps, or placing or retrieving **Edge Protectors**, the **ProPole®** is the solution.

PRO HOOK

SQ-H055-4-1-2

FEATURES & BENEFITS

- Retrieves and re clips fittings that have been stowed on high level lashing points.
- Manoeuvres internal straps at height
- Lifts up the handles of one tonne bags to facilitate fork truck access.

DID YOU KNOW?

- On average, 10 truck drivers are killed on NSW roads every year
- One in 10 injuries are caused by falling from the cabin or the back of the truck.

PRO SWIVEL

SQ H-055-4-1-3

ProSwivel® Every truck must have one!

FEATURES & BENEFITS

- Maintains a 90° angle when placing edge protectors on varying height loads.
- Maintains a 90° angle even when load is in middle or far side of truck.
- The adjustment allows an Edge Protector to be positioned exactly - without sliding up the side of the load. Particularly necessary with paper reels which can easily suffer damage to the outer layer.

DID YOU KNOW?

5 Principles of Load Safety.

- Choose the right vehicle
- Load the vehicle properly
- Use the right securing method
- Use enough restraints
- Communicate and report

SHADOWBOARD

We can customise your Shadow board system. These include the following:

- **Systematic Storage** of all accessories in an organised manner, making it easy to locate them when needed, especially when workers function in shifts
- **Improved Productivity** Knowing where to locate a particular accessory saves valuable time that is often wasted in looking around for the right device, required to service an equipment or machine
- **Easy Traceability** It doesn't take long to notice that a particular device is in use or has gone missing to ensure that safety of the facility is not compromised. On the other hand an empty slot simply means some repair or maintenance job is in progress

CARGO KITE

FEATURES & BENEFITS

- We have invented Floating Sheet Technology™ which following exhaustive calibrated and certified tests allows the CargoKite® to be rated to: LC2500 kgs with a huge safety factor!
- Patent Pending Application No. 14 21667.5
- Tested in excess of 5 tonnes, incorporating webbing with less than a 4% stretch factor!
- Specifically designed for delicate loads that require a wide area of tension

Bespoke Sizes. We can manufacture CargoKites in a number of different size configurations - please ask.

CargoKites®

The professional, safe and easy way to stow your pallet truck on board

First of all the Leader Strap is thrown over the load (or use a RatStrap Pro 5 if insufficient headroom)

Then pull the Leader Strap from the other side which will pull CargoKite up and over into position

Lightweight

900mm x 2500mm

Tail length 1000mm each end

Manufactured from punched mesh and designed specifically for bags of aggregate or powders on low pallets.

TYPICAL LOADS

- 1 COMPOSITE CLADDING OR ROOF SHEETS
- 2 PALLET OF GLASS OR BOTTLES
- 3 SACKS CONTAINING LOOSE MATERIAL
- 4 WASTE CARDBOARD

Finally disconnect Leader Strap from D ring and store in cab, then Ratchet down both ends until tight.

Standard

900mm x 3500mm

Tail length 2000mm each end

This kite can also be used sideways at the end of a flatbed truck or trailer to secure pallets or one tonne type bags.

Price per CargoKite

Product	Code	10+	2-9	1
CargoKite Standard	SQ S-034-1	\$208.00	\$225.00	\$246.00
CargoKite Lightweight	SQ S-034-2	\$192.00	\$208.00	\$227.00

CARGO CAPTOR

CargoCaptor®

The fastest retractable roof mounted CargoStrap system ever!

- NO LOSS OF CARGOSTRAPS
- TIME SAVING
- DVSA COMPLIANT
- EASY TO USE

CargoCaptor® has been designed to bridge the gap between non-compliant roof straps and time consuming ratchet straps

This system can be rated to LC 2000 kgs) or LC 2500 kgs) please ask about it!

Call the Sales Team now for a bespoke quotation!

THE RMS HAVE STEPPED UP ENFORCEMENT OF CURRENT LOAD SECURING LEGISLATION

There are 22,000 road impact accidents each year caused by objects falling from vehicles. Three hundred prohibitions are being issued each month for improperly secured loads. Particular attention is being paid to curtain sided vehicles where the load should be treated in the same way as flatbed vehicles. CargoCaptor® is designed to give you the ease of use of traditional straps whilst keeping you compliant.

The CargoCaptor® reduces prohibitions and the time your vehicle is off road. CargoCaptor® is permanently attached to the vehicle and reduces strap loss.

Pricing on Application

FEATURES & BENEFITS

- Eliminates working from height
- Saves up to 30 minutes a day per vehicle
- Protects load from damage
- Protects your OCRS
- Eliminates strap loss
- No elastic recoil or spring loaded recoil
- Easily retrofits in 1 hour

PRO MEASURE

FEATURES & BENEFITS

- Safety catch to lock arm in place (900) when measuring
- Unique rubber base to avoid damage to the bottom of the measure
- Measures heights up to 5m
- Metric and imperial graduation
- Overall length when retracted – 1260mm
- Supplied with bag for easy storage and transportation

COMMONLY USED FOR

- Loaded Car Transporters
- Recovery & Salvage Vehicles
- Plant Transportation
- Commercial Vehicles
- Height Platforms
- Agricultural Loads

CHAIN OF RESPONSIBILITY (COR)?

WHAT IS CHAIN OF RESPONSIBILITY (COR)?

Let SafeQuip help you comply with your Chain of Responsibility

Did you know.....?

If you consign, pack load or receive goods as part of your business, you could be held legally liable for breaches of the Heavy Vehicle National Law (HVNL) even though you have no direct role in driving or operating a heavy vehicle.

In addition, corporate entities, directors, partners and managers are accountable for the actions of the people under their control.

This is the 'chain of responsibility' (CoR).

Source National Heavy Vehicle Regulator website

All parties in the road transport supply chain have specific obligations under the law to prevent a breach. It is called the CoR and it requires every responsible person in the supply chain to take positive steps to prevent mass, load restraint, dimension, fatigue and speed offences.

A range of penalties (for example, warnings, improvement notices and prohibition orders) give courts greater enforcement measures for penalising offences. They also help to prevent, persuade and target the causes of breaches to ensure a culture of compliance within the heavy vehicle industry.

Breaches of CoR can be both administrative and court imposed and can be tailored to address specific types of offences. For example, the legislation distinguishes between first time offenders and systemic offenders, with more serious sanctions for those responsible persons that persistently break the law.

Source Roads & Maritime Service website

DID YOU KNOW?

Examples of administrative penalties Roads and Maritime may issue include:

- Improvement notices – identifies areas of risk and requires a responsible person to address non-compliance
- Warnings – puts a responsible person on notice to address non-compliance where a minor breach is detected
- Infringement notices – can be an alternative to court proceedings for a less serious offence
- Courts may issue fines as well as having the ability to impose
- Supervisory intervention orders
- Licensing and registration sanctions
- Prohibition orders
- Commercial benefits penalties

SPEED HUMPS

MODULE: SHSTLMOD END: SHSTLEND

STEEL SPEED HUMPS

- **Module Sizes:** 1000mm(L) or 500mm(L) x 350mm(W) x 50mm(H)
- Can withstand 75 tonnes down force per square foot
- Suitable for vehicles and occasional truck traffic
- Suitable for multi-level carparks, commercial, premises, schools and warehousing
- Complies with AS/NZS 2890.1:2004
- 12 month warranty

MODULE: SHPRMOD END: SHPREND

PREMIUM RUBBER SPEED HUMPS

- **Modules Sizes:** 250mm(L) x 360mm(W) x 60mm(H) modules (Black or Yellow)
- Manufactured from TUFF long lasting LLDPE plastic
- Uniform colour throughout, yellow modules are UV stabilised
- Non-slip chequer plate profile to prevent slippage
- Install onto concrete surfaces using fastenings or asphalt/bitumen using asphalt pins
- Suitable for multi-level carparks, commercial premises, schools and warehousing
- Complies with AS/NZS 2890.1:2004
- 5 year warranty

MODULE: SHSRMOD END: SHSREND

STANDARD RUBBER SPEED HUMPS

- **Module Sizes:** 1000mm (L) or 250mm (L) x 350mm(D) x 50mm(H) sections
- Complete with reflective cat's eyes
- 250mm sections available in yellow or black, 1000mm sections are half yellow, half black
- Manufactured from new and recycled rubber
- Suitable for most applications
- 12 month warranty

CONCRETE SHFCONC - ASPHALT SHFASH

SPEED HUMP FASTENERS

- 8off fixings required per metre.
- Installation to Concrete: Screwbolt: SHFCONC
- Installation to Asphalt: Road Spike: SHFASH

TRUCK WHEELSTOPS

\$ see prices on
page 49

FEATURES & BENEFITS

- Heavy steel construction with 6 point fixing
- Available in 2 diameters and lengths
- Hot dip galvanised for harsh environments
- Suitable for truck or machinery parking areas

Truck Stop

Heavy duty wheel stops for use with trucks and mobile machinery in two sizes. Manufactured from heavy wall steel tube and hot dipped galvanised.

Note: This product is designed to be industry specific and as such may not comply for the relevant standards for wheel stop design. Designed to be installed into concrete surfaces.

Material:	Mid steel tube with 5mm wall
Finish:	Hot dip galvanised
Diameter:	90mm or 140mm
Height:	100mm or 165mm
Length:	1800mm or 2000mm
Weight:	23kgs or 40kgs
Fixings:	6 x M10 bolts (supplies)

Part No.	DESCRIPTION
WSTS90	Heavy truck stop 90 x 5 x 1800mm - Galvanised
WSTS140	Heavy truck stop 140 x 5 x 2000mm - Galvanised

CABLE PROTECTORS

DESCRIPTION
Cable cover – 64 x 11mm
Cable cover – 76 x 16mm
Cable cover – 76 x 25mm

HEIGHT CLEARANCE BARS AND CORNER PROTECTORS

\$ see prices on page 52

HEIGHT CLEARANCE BAR WITH FREESTANDING POSTS

- Prevents unwanted damage to vehicles and property caused by oversized vehicles entering areas of restricted height
- Extruded Aluminium powder coated yellow with reflective face
- Displays "LOW CLEARANCE" text and required clearance (please specify)
- Comes with hanging chains/ assembly

HCB

AVAILABLE SIZES:

145 x 40mm tube -

*Available in 5 lengths

HCB 2: 2 metres long

HCB 3: 3 metres long

HCB 4: 4 metres long

HCB 5: 5 metres long

HCB 6: 6 metres long

*Can be custom made to any length

HCBWA, HCBWB, HCBFS, HCBFSB

MOUNTING OPTIONS

- Adjustable height bar standoff bracket
- Flush mount post 90 x 90 x 4mm x 3.2m (custom length on request)
- In ground post 90 x 90 x 4mm x 4m (custom length on request)

CNRPRO

CORNER PROTECTORS

- Help prevent costly damage to vehicles and buildings with our Rubber Corner Protector
- Ideal solution for car parks, warehouses and other applications where dents and scrapes occur

CORNER PROTECTOR CLOSE-UP

- Made in Rubber with bright visible stripes
- Ideal for tight parking areas
- Fixing is with 6 anchor bolts
- **Size:** 840mm lengths x 100mm deep

TEE-LOK & CAM-LOK REMOVABLE BOLLARDS

\$ see prices on
page 51

FEATURES & BENEFITS

- Strong 90mm post with 5mm thick wall.
- Galvanised and powder coated.
- Heavy steel receiver shoe is also used as a storage unit for bollards.
- Requires only 4 off 12mm holes, 65mm deep.
- No core drilling or slab penetration.
- Two unique, low cost T handle keys supplied per order with additional keys available for purchase.
- Fixings for receiver shoe are inaccessible when post is locked in place.
- Optional colours available on request.
- Galvanised and powder coated or 316 stainless steel.
- Heavy steel receiver shoe is also used as a storage unit for bollards.
- Requires only 4 off 12mm holes, 65mm deep.
- No core drilling or slab penetration.
- Internal locking system with high security Cam-Lo with registered keys (includes 2 keys per order).
- Keyed alike option available.
- Fixings for receiver shoe are inaccessible when post is locked in place.
- Stainless model has a flat cap and no handle.

TEE-LOK REMOVABLE BOLLARDS Surface Mount

Material: Steel post 90mm diameter x 5mm wall.
Finish: Hot dip galvanised and powder coated Yellow.
Height: 950mm post height. Receiver shoe only 20mm high with post removed.
Weight: 11.9kgs post / 2.9kgs receiver shoe.
Installation: 4 off 12 x 65mm sleeve anchors.

CAM-LOK REMOVABLE BOLLARDS Surface Mount

Material: 90mm diameter steel post x 5mm wall or stainless steel post x 3.05mm wall.
Finish: Hot dip galvanised and powder coated Yellow or 316 stainless steel.
Height: 950mm post height. Receiver shoe only 20mm high with post removed.
Weight: 11.9kgs post / 2.9kgs receiver shoe.
Installation: 4 off 12 x 65mm sleeve anchors.

PART No.	DESCRIPTION

I: 270 x 270mm Metal

J: 270 x 270mm Polypropylene

With the adoption of the National model Work Health and Safety (WHS) Regulations in 2012, a new system of chemical classification and hazard communication on labels and Safety Data Sheets (SDS), based on the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) will come to effect.

Workplace chemicals will not need to be re-classified or re-labelled immediately. During the current 5 year transition period manufacturers may use either the GHS for classification, labelling and SDS, or the previous hazardous substances and dangerous goods classification systems. After December 31st 2016, at the end of the current 5 year period, all workplace chemicals must be classified according to the GHS and labels and SDS must be updated. The correct GHS classifications are displayed below and are available for companies still needing to comply to the GHS standards set.

EMERGENCY HANDBOOKS

Do your staff know what to do in an emergency?

Contact us for a custom quote on emergency handbook flipcharts!

Safety Maps Flipcharts are available in a range of sizes and formats which comply with Australian standards

1. AS 3745 – Planning for Emergencies in Facilities
2. AS 4083 – Planning for emergencies in Health Care facilities.

Flipcharts include all relevant information you need to be fully compliant with the above standards. This includes procedures and check lists for all Emergency codes as detailed in the standards.

We also include a fully customised front page which enable you to tailor these flipcharts to your own site. You can include your Company logo and emergency contact information etc.

Flipcharts are available for purchase in a variety of sizes:

- Large format 190mm x 297mm (Wall Hung)
- Small format 110mm x 220mm

PBSS

BRACKETS

Single sided ring Brackets

- For 50mm NB galvanised posts
- With bolt and washer

PBUC

U-CLIP BRACKETS
For Braced Signs

- For use on signs with bracing
- 60mm (to fit 50mm NB posts)

SPC50

CAPS FOR POSTS

- To suit 50mm NB galvanised posts

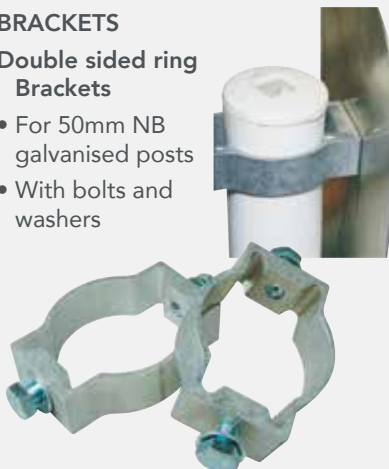

PBDS

BRACKETS

Double sided ring Brackets

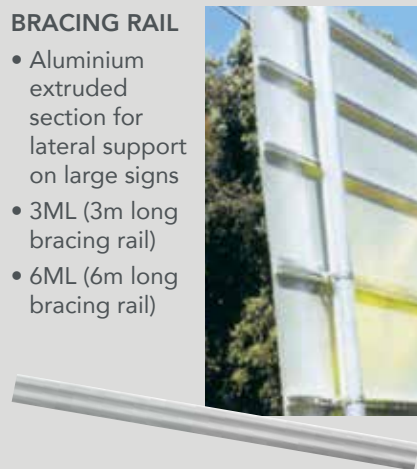

- For 50mm NB galvanised posts
- With bolts and washers

BR

BRACING RAIL

- Aluminium extruded section for lateral support on large signs
- 3ML (3m long bracing rail)
- 6ML (6m long bracing rail)

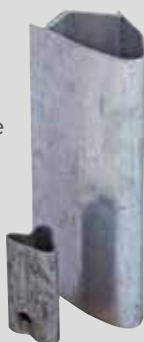

PSV275

POST SOCKETS

V Type

- Flush to ground type from mounting in concrete.
- Fully galvanised - 275mm long

PB2PR

BRACKETS

Two piece ring bracket

- For 50mm NB galvanised posts
- Single sides with bolt and washer

PARKBR

PARKING SIGN BRACKETS

- Double Hole (in brackets)
- Supplied with bolts (2 brackets required per sign)

PSMS450

POST SOCKETS

Metal Spike Type

- To be driven into soil to hold sign posts
- Supplied with wedge - 450mm

CUSTOM SIGN SERVICE

We specialise incustomised "one-off" signs. We will produce any type of sign to suit your specific need. These header blanks are available in a range of sizes for you to put in your own caption. or if none of these suit your need, the design is up to you. Being a custom sign, the size of the sign and any text, pictures or logos are produced entirely according to your own requirements.

MODDEX BARRIERS

SAFESTOP® PEDESTRIAN BARRIERS

Robust guardrail protection for workers across mezzanines, service platforms, pedestrian walkways, hazardous areas & fall edges. Provides safe delineation between work zones, operators, equipment and vehicles. Safer no-weld or drill assembly and simply retrofitted, modified or extended. Stair, toeboard and fork protection configurations available.

THE VERGE SAFETY BARRIER

see prices on
page 107

WHAT IS IT?

Gone are the days where a painted line on the floor is an acceptable means of separation between vehicle movement and personnel. As a result of careful analysis, Verge was specially designed to address this segregation. The pedestrian protection barrier is a sturdy and attractive construction which offers a high level of safety and orderliness in the working environment.

Verge provides substantial protection against vehicle traffic and with the adaptability of the modular handrail, the Verge barrier provides a safe passageway for emergency evacuation, bringing compliance into the workplace.

WHERE VERGE IS REQUIRED:

- Freight terminals
- Warehouse application
- Production areas
- Shopping centre car parks
- Loading docks
- Hospitals
- Food and wine industries

THE VERGE SAFETY BARRIER

WITHOUT MODULAR HANDRAIL

\$ see prices on
page 107

The pedestrian protection barrier is a sturdy and attractive construction which offers a high level of safety and orderliness in the working environment.

FEATURES:

- WH & S Acceptance
- Superior Strength and finish
- Fully modular
- Optional lengths to suit all requirements
- Accessory options
- Flat pack
- Ease of installation
- 5 years warranty

VERGE SELF-CLOSING SWING GATES

The Verge Self-Closing Swing Gate Attachment gives you a continuous secure barrier whilst providing access points where required. These gates can be placed in areas of general access or positioned for access of plant and equipment for maintenance or replacement purposes.

Features:

- OH&S Acceptance
- Superior Strength and finish

Specifications

CODE	DESCRIPTION
 VSG110	Self-closing swing gate kit to suit 1000mm H barrier

VERGE VIVID GATE POST WITH WARNING LIGHT AND SIGNAL

Our Verge Flashing Gate Post Light alerts forklift operators when the safety gate has been opened warning them of the potential danger of pedestrians in the area. The Flashing Light Gate Post was designed to protect workers and equipment by improving the visibility of pedestrians in the workplace.

The innovative design sounds an audible signal when the light is flashing to assist operators during periods of low visibility providing increased protection for pedestrians.

Features:

- 12 volt DC 4 AH rechargeable battery - No electrical wiring required
- Maintenance free LED Red flashing Light 100 Flashes/min
- Audible signal when light is flashing
- Low voltage warning light and beeper – notifying battery change
- Remains flashing for 15 seconds after opening
- Sturdy metal construction
- Powder coated safety yellow

Benefits:

- Warns vehicle operators of pedestrian presence
- Add awareness to pedestrians that they are entering a danger zone
- Work cover acceptance
- Low maintenance

VERGE SAFETY BARRIER – WITH MODULAR HANDRAIL

Verge Safety Barriers with Handrail are fitted with a modular handrail attachment providing a compliant 1m high handrail to the walkway side of the Verge pedestrian barrier. The purpose of V-Rail is to create an ultimately safe passage offering support and assistance as well as a grab point in a trip incident. V-rail is essential for escape routes, to protect and guide when visibility is an issue in the event of power failure, fire and emergency evacuation.

Features:

- Compliant 1m high handrail
- Provides a safe passageway for emergency exits
- Provides a grab point in event of trip/fall
- Offset by 100mm preventing tripping on the barrier
- Flat pack
- Ease of installation
- 5 years warranty

V-STOP FLOOR ANGLE

The fixed heavy-duty Floor Angle is designed to prevent pallets and forklift tines from protruding into the designated walkways.

Features:

- OH&S Acceptance
- Superior Strength and finish
- Fully modular
- Optional lengths to suit all requirements
- 5 years warranty

RETRACTA-BELT

\$ see prices on
page 104

RETRACTA-BELT 7.6 Metre Wall Mount

Retracta-belt Wall Mount units are designed for wall mounting where floor space is limited or post and base units are not appropriate. This model is particularly useful in large span areas like warehouse aisle closures and loading docks.

Material: High-impact Black polycarbonate housing.
Extension: 0-7.6 metres.
Delivery: Complete with bracket and wall receiver.
Belt: Available in five standard colours.
Installation: Permanent, screw fixed.

RWM76-YW Retracta-Belt 7.6m wall mount -Yellow (12kgs)

RWMMC Retracta-Belt magnetic wall clip

NBWR Additional wall receiver

RETRACTA-BELT 7.6 Metre Magna Mount

The magna-mount is a magnetic retractable belt barrier that offers all the same features as the wall mount model. The magnetic base mount and magnetic belt clip creates the flexibility of being able to be quickly relocated and repositioned in minimal time. Safety bungy prevents damage if accidentally dislodged.

Material: High-impact Black polycarbonate housing.
Extension: 0-7.6 metres
Delivery: Complete with magnetic base and belt clip.
Belt: Available in Red/White or Black/Yellow.
Installation: Semi-permanent, magnetic fixed.

FEATURES & BENEFITS

- Available in five standard colours.
- Can be quickly deployed at any time.
- Can be quickly deployed at any time.
- Magnetic mounting for temporary placement.
- Designed for use where fixed barriers are not available and has ability to span large areas.
- Available in two colour combinations.

SELF-CLOSING SWING GATES

see prices on
page 104

FEATURES & BENEFITS

- Self-closing operation.
- Freestanding design.
- Supplied with 3 metre aluminium beam.
- Can swing inward or outward.
- Can be used in pairs for wider openings.
- Optional lockable receiver kit available.

Description:	Self-closing pedestrian or vehicle gate.
Material:	Mild steel galvanised post and powder coated aluminium rail.
Rail type:	Single aluminium extrusion 145 x 40mm. Push open-spring assisted closure.
Operation:	Push open-spring assisted closure
Gate swing:	270 degrees
Gate stop:	Built-in stop at closed.
Opening:	Single gate 3 metres.
Max. open:	Double gates 6 metres.
Adjustment:	Length of rail can be cut down on site.
Height:	1000mm
Mounting:	Surface mount post.
Weight:	31kgs post / 28kgs beam

MANUAL BOOMGATE AND MEZZANINE GATES

see prices on
page 104

DOCK-SAFE MANUAL BOOM GATE

Description: Loading dock manual boom gate.
Compatibility: Stand-alone, one per doorway.
Material: Mild steel galvanised, powder coated posts.
Powder coated aluminium 4.5 metre rail.
Finish: Powder coated Yellow with reflective.
Rail type: Single alumm1um extrusion 145 x 40mm.
Operation: Spring assisted lift.
Gate swing: 90 degrees vertically.
Max. open: 4.5 metres.
Min, open: 3 metres.
Adjustment: Rail length can be cut down on Site.
Height: Bollard 1000mm. Rail 1050mm.
Clearance: Above - boom length plus 1 metre.
Mounting: Surface mount posts.
Weight: 75kgs gate assembly with 4.5 metre rail.

MEZZANINE FORKLIFT GATE

Description: Mezzanine forklift safety gate.
Material: Mild steel galvanised, powder coated posts.
Powder coated aluminium rails.
Finish: Powder coated Yellow with reflective.
Rail type: Aluminium extrusion 145 x 40mm.
Operation: Geared & counter-balance assisted 11ft.
Gate swing: 90 degrees vertically.
Max. open: 1500mm w,de x 2000mm deep.
Height: 1000mm.
Clearance: Above - boom length plus 1 metre.
Mounting: Surface mount posts.
Weight: 130kgs gate assembly (approx).

FEATURES & BENEFITS

- Helps prevent elevated loading dock accidents.
- Adjustable spring assisted lifting.
- Vertical lift requires very small footprint.
- Gate bollards protect sensitive roller door tracks.
- Standard 4.5 metre rail can be cut to any length.
- Aluminium rail includes hi-vis reflective panel.
- Kit includes gate post, boom and receiver post.

- Ensures safe loading/unloading of elevated areas.
- When one gate is open, the other is closed.
- Excludes pedestrians from unprotected edges.
- Integral kick rail as per AS 1657:2013.
- Standard 1.5 metre opening suits most pallets.
- Aluminium rails include hi-vis reflective tape.
- Kit includes all posts, booms and hardware

LINEMARKING WATERBORNE

- **Waterborne linemarking** is suitable for application to bituminous and concrete roads
- Environmentally friendly with no ozone depleting emissions, is lead free and requires no organic solvents for clean up
- Fast drying time minimises coning and traffic disruption
- Drop-on glass beads complying with AS2009 can be applied for optimum retroreflectivity
- Available Colours - White, Yellow, Black, Grey, Green, Blue, Red

LINEMARKING LONGLIFE DEGADUR

- **Degadur Linemarking** is suitable for application to bituminous and concrete roads.
- Recommended for areas with high traffic flow or areas with heavy duty machinery operating
- Environmentally friendly with no ozone depleting emissions, is lead free and requires no organic solvents for clean up - non toxic
- Fast drying time minimises coning and traffic disruption
- Drop-on glass beads complying with AS2009 can be applied for optimum retroreflectivity
- Depends on service conditions and applied thickness. When correctly applied to manufacturer's instructions a life expectancy of up to 10 years can be achieved
- Available Colours - White, Yellow, Black, Terracotta, Brazen Red, Dove Grey, Seagull Grey

ANTI SLIP COATINGS

DIAMOND BRUSH ANTI-SLIP TREATMENT

BEFORE

AFTER

An environmentally friendly system that complies with AS/NZS 4586:2004 Australian Slip Standards & Duty of Care Legislation, to attain the desired slip resistance. It uses diamond impregnated brushes and water to cut and achieve desired slip resistance when wet to;

- Vitrified Ceramic Tiles
- Polished Porcelain Tiles
- Exposed Aggregate
- Granite
- Pebblecrete
- Polished Concrete
- Terracotta
- Urban Stone
- Most Masonry Surfaces

Advantages:

- No dangerous chemicals or solvents used in this process, only water
- Low noise level low speed scrubber used in process
- Fast results
- Cleans ingrained grime from surface
- No damage to edges of tiles from unevenly laid tiles / pavers as brushes ride over the edge

LINE MARKING PAINT

\$ see prices on
page 115

LINEMARK- AERO

Ultracolour Line Marking Paint – Inverted aerosol paint cans available to suit either machine use or hand held application. Available in a wide range of long lasting lead free colours.

Hand Held version: has a spray through cap for all hand-use applications, including stenciling of disabled parking spaces, pedestrian crossings and more – 500g per can.

Applications for: Line - Marking, Warehousing and Civil Engineering industries.

Available Colours:

Blue	Black
Clear	Green
Grey	Orange
Red	White
Yellow	

Boxed in 12

LINE MARKING MACHINE

Ultracolour 4 Wheel Line Marking Machine – A solid construction with soft rubber tyres ensuring smooth operation and consistent coverage. Takes cans of various heights. Incorporates a side mount for working right up against walls. Quick and easy marking of lines for ovals, car parking spaces and more. For use with standard line marking cans.

CONCRETE REPAIR SERVICES

- SafeQuip can provide concrete repair services, ranging from a small crack repair to complete concrete slab replacements
- For permanent or temporary repair to uneven and damaged footpaths
- Examples of use: eliminate trip hazards, fill broken kerbs, storm water lintels, repairs to cracked concrete

CALL US NOW for a free consultation and quote.

CONCRETE SEALING

- Concrete Sealing is a clear or coloured acrylic Polymer coat, used on concrete floors, drive ways, paths and other masonry products.
- It seals porous surface, enhances the appearance, eliminates dusting and ensures easy cleaning
- Fast drying time – to minimize disruption
- Environmentally friendly

FLOOR TAPES

TACTILES

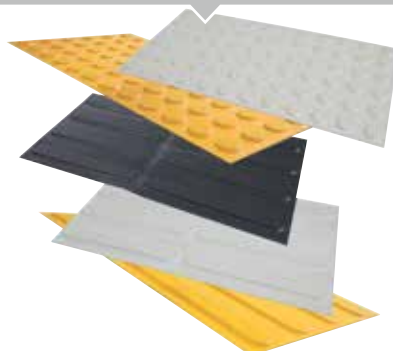

TAC-IND

TACTILE INDICATORS

- Tacalert tactile indicators in stainless steel and PVC
- Manufactured to meet AS/NZS 1428.4
- Available in PVC, ceramic, stainless steel and brass
- Install on all surfaces including carpet
- Ideal for retro fitting
- Suitable for interior or exterior applications
- Bevelled edges for safe transition

FAST-TAC

FAST TILE TACTILES

- Tacalert fastile - peel and stick
- Easy Installation to concrete, ceramic, stone, timber and low profile carpets
- Suitable for interior and exterior applications
- Manufactured from UV resistant PVC materials and conform to AS/NZS 1428.4
- Bevelled edges for safe transition
- Ideal for retro fitting to new construction and refurbishments
- Colours: Black, Yellow and Grey

STAIR TREADS

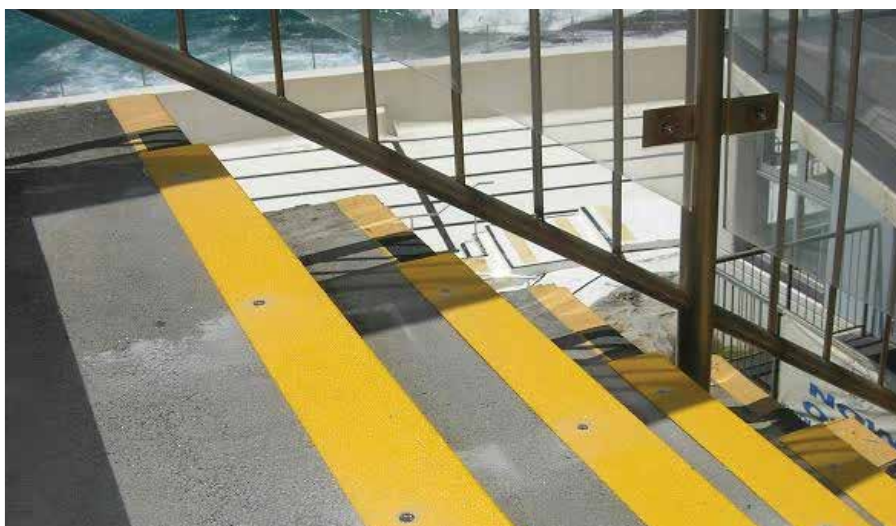

SafeQuip offer a comprehensive range of architecturally designed profiles to meet every demand, from heavy duty traffic in railway stations to the more general retail/office use, providing maximum pedestrian safety and WHS requirements. Step Master Stair Nosing's are manufactured to meet and exceed the Australian standards and building codes.

Design features include:

- Unique installation method, with hidden fixings
- Clear or Black anodised finish
- Non-toxic abrasive insert
- Wide range of colours and profiles
- Install onto various substrates and finishes

Usage includes:

- Railway Stations
- Airports
- Hospitals & Health Care
- Education Facilities
- Shopping Plazas
- Public Domains
- Plus many more

ECLIPSE NOTICEBOARDS

SafeQuip Eclipse noticeboards are constructed from durable aluminium, powder coated to the colour of your choice with anodizing finishes also available. For a more professional appearance outdoor noticeboards can be fitted with specially adapted header panels to feature your organisations logo.

Key features and benefits of Eclipse Noticeboards are:

- Unbreakable polycarbonate cover - **Vandal proof**
- Cover supported by gas/air struts - **Supports cover whilst message is being changed**
- Message secured with stainless steel pinlocks - **Ensures your message is secure**
- All aluminium Powder coated message case - **Durable and long lasting**
- Cover frame with felt inlay - **Weather proof**
- 2 Year warranty - **for your peace of mind**
- High quality self healing Krommenie Cork - **is an extremely durable rubber/fibre compressed compound material that hides pinholes and is resilient in all outdoor weather conditions**

WHITE BOARDS

A whiteboard is any glossy, usually white surface board for non permanent markings. They allow rapid marking and erasing of markings on their surface.

Features:

- Only non toxic, water soluble, environment friendly glues are used
- Magnetic writing surface
- Stylish rounded corners - no unsightly exposed brackets
- Wall fittings included
- Aluminium pen shelf
- Exceptional 8 year writing surface warranty
- Backing board is environment friendly 'bio board' made from recycled biomass

They are popular fixtures for:

- Offices
- Meeting Rooms
- School Classrooms
- Work spaces

LOST TIME INJURY BOARDS

Lost-time injury is an occurrence that has resulted in a fatality, permanent disability or time lost from work of one day/ shift or more. Displaying Lost time injury can play a vital role in your organisations Occupational Health and Safety.

SafeQuip offer Lost Time Injury Boards to display this information clearly to all employees and visitors within and to your organisation.
